The screenshot shows the 'Merchant Administration' interface. The 'Profile' section is active, displaying 'Payment Account Settings'. Under 'Payment Options Update', the 'Return Value Link (Datafeed)' is set to 'Enable'. A text input field contains a redacted URL, and a 'Test' button is next to it. A note below states: '**Please note that the system only supports either port 80 (HTTP) or 443 (HTTPS) for the datafeed page location. And make sure the datafeed page location is externally accessible, so that our server can call the datafeed page. **Please consult with your development/IT team before update as it may seriously affects the location of return value.'

- On the confirmation page, review your changes then click the “Confirm button”.

The screenshot shows the 'Payment Options Update Confirmation' page. The 'Return Value Link (Data Feed)' is highlighted with a red box, showing 'Enable' and a redacted URL. Other settings include 'Data feed failure alert by email to contact email' (Disable), 'Payment method selection in payment page' (By Logo), 'Create Direct Payment Link Default Page' (Successful Page Return Url), 'Fail Page Return Url', 'Cancel Page Return Url', 'Default Expiry Date (Month)' (1), and 'PayBooth Settings' (Not Set). The 'Confirm' button is highlighted with a red box.

5. The Datafeed URL has been set.
